

#74140 Installation Guide

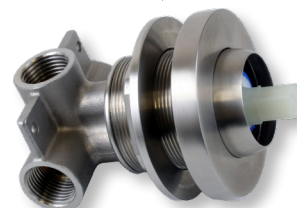

Unscrew the hex screw from inside of the Stainless Steel cap to remove it from the faucet body.

Screw on the Stainless Steel mounting nut and insert faucet through the 1-7/8" mounting hole from the back.

Adjust the mounting nut to the proper depth and screw on the front trim ring. Tighten the mounting nut behind the bulkhead to fix the faucet to the bulkhead.

Screw the stainless steel cap ring back on and screw the handle into the cap.
